Software Engineer | Backend Software Engineer

Systems Engineer with over 15 years of experience in IT and software development, contributing to backend projects, quality assurance, infrastructure, support, and cybersecurity. I have designed, developed, and maintained enterprise applications, REST APIs, and backend services using Java and Spring Boot, and have actively participated in all phases of the Software Development Life Cycle (SDLC), from analysis and design to testing, deployment, and maintenance.

My experience combines software development with a solid foundation in quality, security, and infrastructure, allowing me to build scalable, resilient, and operationally oriented solutions. I have participated in code reviews, architectural decisions, test automation, and the development of backend services on relational databases, applying best engineering practices and secure development.

I complement my experience with a Specialization in Information Security, a Computer Programming Diploma obtained in Canada, and the EC-Council Certified Cybersecurity Technician (CCT) certification. I am seeking to contribute my experience as a Backend Software Engineer in teams developing high-availability and high-impact platforms.

TECHNICAL SKILLS

Languages: Java, Python (Automation and Scripting)
Backend Development: Spring Boot, REST APIs, Backend Services, Maven, MCP
Software Engineering: SDLC, Code Review, Design Patterns, Refactoring, Testing
Architecture: Microservices, Distributed Architectures, System Integration
Databases: SQL, PostgreSQL, MySQL, Oracle, SQL Server
Tools: Git, Docker, Maven, Jira, Postman
Quality: Selenium, Cucumber, JUnit
Security: Secure Development, API Security, OS Hardening
Infrastructure: Linux, Windows Server
Methodologies: Agile, Scrum

CERTIFICATIONS AND EDUCATION

- **C|CT** – Certified Cybersecurity Technician, EC-Council, USA (12/2025)
- **Diploma in Computer Programming** (Co-op), Georgian College, Barrie, Canada (2021)
- **Specialization in Information Security**, Universidad Piloto de Colombia, Bogotá (2018)
- **Systems Engineering** (Bachelor's Degree), Universidad Piloto de Colombia, Bogotá (2010)

PROFESSIONAL SUMMARY OVERVIEW

(See second page for detailed descriptions)

- **Backend Software Engineer**, Rugged Books Inc. Canadá (2021 – 2026)
- **IT Analyst**, Antojitos Inc. Canadá (2019 – 2020)
- **QA Analyst**, Choucair Testing S.A. Colombia (2018 – 2019)
- **Software Engineer**, Acies Colombia (2016 – 2017)
- **Service Support Engineer**, Adecco Servicios Colombia S.A. / Agfa Healthcare (2012 – 2016)
- **Support Engineer**, Hospital Fontibón E.S.E. Colombia (2011)
- **Software Developer Analyst**, Centro Nacional de Consultoría Colombia (2010)

PROFESSIONAL EXPERIENCE

Backend Software Engineer – Rugged Books Inc. | Ontario, Canada | Oct 2021 – Mar 2026

- Developed backend services and REST APIs using Java, Spring Boot, MySQL, and Maven, integrating functionalities consumed by web, mobile, and internal services.
- Actively participated in the platform's technological evolution, leading migrations from Java 8 to Java 21 LTS and Spring Boot 2.7 to 3.5.x, ensuring stability and long-term support.
- Implemented Artificial Intelligence capabilities via Model Context Protocol (MCP) to securely expose functionalities through APIs.
- Participated in code reviews, Pull Request management, and all SDLC stages, from analysis and development to testing, deployment, and maintenance.
- Automated validation and testing processes to improve application reliability, precision, and operational efficiency.
- Managed development environments using Docker Compose, GitHub, and Jira, applying secure development practices and collaborating on technology infrastructure support.

IT Analyst – Antojitos Inc. | Barrie, Ontario, Canada | Jun 2019 – Mar 2020

- Participated in the Georgian College Co-op program, providing comprehensive technology support.
- Designed and developed the corporate website and features to improve the business's digital presence.
- Developed a cross-platform mobile application using Flutter, integrated with backend services to dynamically publish menus and promotions.
- Administered technology infrastructure, including workstations, networks, communication devices, and internal systems.
- Configured wired and wireless networks, supporting deployment and maintenance.
- Documented technical procedures and handled incidents to ensure operational continuity.

QA Analyst – Choucair Testing S.A. | Bogotá, Colombia | Feb 2018 – Apr 2019

- Designed, developed, and maintained automated tests using Java, Selenium WebDriver, Cucumber, Maven, and Gherkin.
- Implemented automated test scenarios under the Behavior-Driven Development (BDD) approach, facilitating functional validation and collaboration.
- Executed functional, regression, and integration tests, identifying defects and improvement opportunities throughout the SDLC.
- Analyzed, documented, and tracked incidents, collaborating with development teams to ensure application quality.
- Participated in the definition and application of quality assurance processes and best practices.

Software Engineer – Acies | Bogotá, Colombia | Nov 2016 – Jul 2017

- Developed and maintained JAVA software solutions for enterprise applications, implementing new functionalities and improvements.
- Analyzed functional and technical requirements to design stable, secure solutions aligned with business needs.

Diego Alejandro Estrada Beltran

86diegoestrada@gmail.com | linkedin.com/in/86daeb | github.com/diegoaestrad

- Participated in backend and mobile application development, prioritizing software performance and maintainability.
- Drafted technical documentation and supported maintenance, control, and continuous improvement activities.

Service Support Engineer – Adecco Servicios Colombia S.A. (Agfa Healthcare) | Nov 2012 – Nov 2016

- Provided specialized support for RIS/PACS platforms used in healthcare institutions for diagnostic imaging and clinical information management.
- Administered and supported Oracle databases, virtualized infrastructure with VMware ESX, and EMC VNX/Centera storage platforms.
- Diagnosed and resolved incidents related to applications, infrastructure, and networks in mission-critical environments.
- Advised end-users and documented technical procedures to ensure operational continuity and process compliance.

Support Engineer – Hospital Fontibón E.S.E. | Bogotá, Colombia | Feb 2011 – Jun 2011

- Developed internal applications to support administrative and healthcare processes.
- Administered databases and provided support for servers and technological platforms.
- Trained end-users in institutional applications and tools.
- Provided technical support to ensure IT service availability.

Software Developer Analyst – Centro Nacional de Consultoría | Bogotá, Colombia | Apr 2010 – Dec 2010

- Developed applications for research projects and surveys using Java and Delphi.
- Designed and executed SQL queries for data processing and analysis.
- Processed and transformed data from Apache Derby to SPSS to support statistical processes and report generation.
- Ensured the quality and integrity of information used for decision-making
